Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/535,344	Applicant(s) ODAKE ET AL.	
	Examiner Seung H. Lee	Art Unit 2887	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pollock et al. (GB 2275654)(hereinafter referred to as 'Pollock') in view of Ando (JP 2003076967).

Pollock teaches a smart card comprising a display (120), an interface unit (160), and an energy store (150) for receiving external power (see fig. 1; page 3, line 23-page 5, line 19).

However, Pollock fails to particularly teach that the smart card comprising an electric double-layer capacitor for providing power to components of the smart card.

Ando teaches a non-contact IC card having an electric double layer capacitor to store power from the electromagnetic waves from the host system to operate the IC card (see figs. 1 and 2; computer translated detailed description).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the teachings of Ando to the teachings of Pollock in order to operate the smart card using the stored power in the electric double-layer capacitor when the power supply is interrupted.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Morizumi et al. (US 6459588) teaches a noncontact IC card.
